

Boilermaker Fitter Welder – Night Shift

We are presently looking to employ on contract a Boilermaker/Fitter Welder.

This role requires good welding and maintenance skills on heavy earth moving equipment and general fabrication. So it would be preferable if you have a background in open cast mining industry.

This is a nightshift position and you will be performing duties outside in all weather conditions with some workshop time.

You will:-

- Have excellent all positional stick welding skills and understand the importance of pre/post heat applications
- Have current or have previously held welding tickets
- Have good experience in heavy earthmoving equipment, maintenance, and general fabrication techniques.
- BE able to work unsupervised and on your own
- Be able to work nightshift
- Have your own tools
- Be good with improvisation

In return our client offers an excellent hourly rate and interesting work. This position could lead to permanent employment to a suitable candidate.

To be considered immediately please email your cv with covering letter ASAP.
