

Mechanical Engineer

Are you looking for something a little different?
Perhaps you would like a change in scenery, a move to a rural lifestyle?

Now is your opportunity to join a well-established technology company based in Marton, Rangitikei.

Part of the Gallagher Group, Gallagher Fuel Systems design and manufacture their own product, (Retail Fuel Dispensers). Supporting NZ made by providing Manufacturing Services to a broad range of NZ Hi Tech Innovators who are taking their products across the Globe.

A bit about the role:

As a Mechanical Design Engineer, you will design and develop innovative fuel dispensing solutions at Gallagher Fuels Systems. You will lead mechanical sub projects to deliver on Gallagher Fuel Systems Product Plan.

Key Responsibilities Include:

Product Design

- * Preparation of Design documents including Requirement Specifications, CAD Models, Design Drawings, Test plans and results, and design transfer documentation.
- * Construct and evaluate design prototypes
- * Provide Training and support for product assembly, technical writing, technical support, test analysis, sales and marketing in product technical features

Project Leadership

- * When required, lead and manage mechanical sub-projects to deliver on the company product plan and ensure outcomes are delivered within agreed requirements.

Design Quality and Support

- * All engineering and design work is completed in accordance with Gallagher Fuel Systems design practices and procedures.
- * All product designs are documented including as minimum marketing requirements, design specifications/calculations/outlines, test plans and results.
- * Provide product design support when requested.

Reporting

- * Provide Daily and weekly reports as required to Team Leader and/or Project Leader on activities and progresses.

The successful person will:

- * Be Degree Qualified or Equivalent in a Mechanical Engineering Discipline or equivalent.
- * Have 2+ years product design experience in a Mechanical Design Engineering Role.
- * Have worked with cross functional teams to deliver successful, commercial product design outcomes
- * Have Fuel dispensing or oil industry experience (Desirable)
- * Display good oral and written communications
- * Have the Technical knowledge that is relevant to Product Design at Gallagher Fuel Systems
- * Adhere to all Health & Safety requirements and support improvements to Health & Safety

Gallagher Fuel System has a family culture we're all team members are encouraged to participate collaboratively, bring forward ideas, challenge the status quo and seek to improve what we do.

To be considered for this role, an interview will take place and references will be conducted.
Applicants for this position should have NZ residency or a valid NZ work visa.
