

Quantity Surveyor

Our client is a high-growth, ambitious National Contractor with its roots firmly within commercial/residential & interiors.

Our client is going through lots of change and is constantly evolving, therefore, they're looking for entrepreneurial people who can grow with the business and take on more responsibility as they scale.

Responsibilities of the role will include:

- You will undertake feasibility studies, advise on procurement strategy, analyze and develop response to commercial risks, tenders and financial control systems.
- You will manage cost effectiveness in projects, from initial calculations, preparing early stage budgets and detailed cost plans, to the final costs.
- You will be responsible for coordinating all due diligence and attend site meetings with clients, investors and site managers.

The ideal candidate will possess the following skills and traits;

- Tertiary Qualifications in quantity surveying or the like;
- Minimum of 3 - 4 years experience in QS;
- Experience working for a main contractor on multi-million\$\$ projects;
- The ability to work closely with management and develop key working relationships within the business is essential;
- Versatile and happy to take on extra duties outside of job description;
- and finally Entrepreneurial.
