

## ***Industrial Electrician***

Our client is looking to appoint an Industrial Electrician to their existing team.

To be considered for this role you will or may have the following:-

- Trade qualified with a current practicing license;
- 10 years operating/maintenance and/or construction experience with process plants or similar sized industrial plant.
- Condition based maintenance techniques.
- Experience in instrumentation maintenance and calibration.
- Experience with computerised Asset Management & Maintenance Systems.
- Able to work unsupervised;
- Have high standards of workmanship;
- Think on your feet and take responsibility for outcomes;
- Good verbal and written communication.
- Eventually go onto Rostered Callouts & Emergency Response

Long term, our clients offer opportunities for career progression and professional development within an industry which tend to be seen as 'recession proof'.

If this role is of interest, please apply immediately. If this role isn't quite what your looking for send your cv to JOBsmith anyway. We may have another role of interest to you.

Applicants for this position should have NZ residency or a valid NZ work visa.

Email your cv to [anne.smith@jobsmith.co.nz](mailto:anne.smith@jobsmith.co.nz)
