

Mechanical Maintenance Operator

In this position, as Mechanical Maintenance Operator, you will undertake a mix of preventive and corrective maintenance tasks and a mix of other interesting duties that would require some training.

The role is responsible for maintenance and operations support, key tasks and responsibilities are as follows:

- Maintenance of all plant equipment (Planned, Routine , Breakdown);
- Fitting, turning and mechanical work;
- Fault finding and repairs to equipment.;
- Monitoring of mechanical equipment;
- Use of work shop equipment - operating lathe, mill/drill, welding equipment, tools;
- Undertaking designated operations duties;
- Monitoring of operations when tasked with this duty.

Experience:

- Provide hands-on mechanical experience;
- Exposure to 'process' industry and basic understanding of various technologies and processes is preferable;
- Proven ability to establish and maintain working relationships with colleagues and contractors;
- Ability to fault find on mechanical equipment;
- Proven problem solving skills.

Exposure to industrial plant or commercial buildings and associated services will be a distinct advantage; along with and Engineering or Technical trade background.
